

Dust extractor VCE7500D

3-phase, motor power of 7.5 kW

Longopac dust bag system

H13 HEPA filter ensures 99.95 % particle capture $\geq 0.3 \mu\text{m}$, keeping air clean and safe

Non-marking 10-inch wheels that are construction site proof

The VCE7500D dust extractor impresses with its combination of high air flow and vacuum pressure and has an integrated pre-separator. The system works with cyclone technology, the pre-separator, 15 pre-filters and two HEPA filters. The suction system is particularly recommended for the FGE780R4

floor grinder but is also suitable for other applications where efficient dust extraction is required. Thanks to its robust design, the suction system is ideal for construction sites and the wheels do not mark the floor. The VCE7500D dust extractor is dust class H certified.
